DESIGN

Our instruments are designed for optimal balance, feel, comfort and responsiveness to deliver a seamless connection between the hand and the surgical site.

SAFETY & RELIABILITY

The craftsmanship and the quality of materials we select combine to deliver high performance, electro-safe instruments that deliver unrivalled durability, longevity and reliability.

• **Easy to re-process** Our instruments are designed to simplify re-processing.

• **Clinical performance** Our hand-held instruments are modular allowing you to build cost effective instrument trays whilst maximising patient safety and clinical performance.

HANDLES

Our handles are designed for balance and their curved ergonomic shape improves comfort and helps to reduce fatigue.

Control Easy to operate fine control rotation knob for optimal single handed control.

Comfort Rounded ergonomic handle improves comfort and reduces fatigue.

Precision Ratchet mechanism provides excellent, durable tissue and grip control.

Safety Additional insulation improves protection for the user.

Handles - 'C' Series

Our composite 'C' series handles come as standard, ratchet, multi-function and swing away ratchet versions.

'C' Series Standard Composite Handle		
RE-ORDER	FEATURES	MIN QTY

INSERTS - FORCEPS

Eisner™ inserts are tough performers designed to deliver high fidelity control without compromising on their durability, lifespan and reliability.

- **Easy to manage** Our inserts are designed to self-open for sterilisation.

- **Durable** No weld design ensures long-term performance.

Working Length Inserts available in standard and bariatric lengths.

Performance Broad range of precision jaws to support all types of procedure.

Inserts - Forceps (5mm)

We offer a broad range of jaw types in both standard and bariatric lengths to cover all minimally invasive procedures.

All our inserts are fully compatible and inter-changeable and designed for durable, reliable performance.

INSULATED TUBES, SHEATHS & LOCKING NUTS

Our insulated tubes are designed for easy re-processing and to reduce the potential for fluids, debris and bio-burdens to enter under the insulation.

10MM INSULATED TUBE

Durable Insulation material density increased three-fold to minimise splitting, cracking or deformity.

5MM INSULATED TUBE

Ease Our Ezi-Clean™ Insulated Tubes have a removable sheath for easy cleaning and simple assembly.

Our range of coloured locking nuts help you to code your instruments trays to specific laparoscopic procedures.

Insulated Tubes, Sheaths & Locking Nuts (5mm)

Our insulated tubes are made from surgical grade stainless steel and have a high performance PPSU polymer insulation designed to resist heat, impact and chemicals.

Tubes and sheaths are available in standard and bariatric lengths and in both 5mm and 10mm diameters.

We work at the intersection between the surgeon and their patient, designing high performance, responsive laparoscopic instruments that offer a seamless connection between the hand and the surgical site.

DIATHERMY - MONOPOLAR

Eisner™ Monopolar Electrodes are uncompromising on patient and clinician safety.

Safety Overlapping electro-safe cable connection.

Durable Our light-weight Ceramatip® electrodes feature a hardened durable crystalline ceramic tip.

Diathermy - Monopolar

Eisner™ Electrodes are uncompromising on patient and clinician safety. Every instrument we make must meet our own exacting standards which far exceed Australian standards. Our 300-100 series electrodes are made from a hard coat PPSU polymer and come with an Electro-Safe grip & plug on their distal end.

Our light-weight Ceramatip® 'L'-Hook and Spatula feature a hardened durable crystalline-ceramic tip, a stop-roll handle moulding, quality hard PEEK shaft insulation and an overlapping electro-safe cable connection.

We have always felt the highest duty of care to you and your patients. With every iteration of our products we aim to set the standard in safety and performance.

NEEDLEHOLDERS

Our Genesis Needleholder series offers ergonomic axial and pistol style handles together with a range of jaw inserts as part of a modular three-piece dismantlable design that simplifies re-processing whilst delivering optimal comfort, tissue grip and needle guidance during suturing.

- Ergonomic design
- Available in standard and bariatric working lengths
- Three different handle styles
- Jaws available in four different profiles: straight, left & right curve and self adjusting

Dismantlable 3 piece design simplifies re-processing

SINGLE USE INSTRUMENTS

We understand the impact inferior equipment can have on your performance, which is why we have worked closely with surgeons in the development of our Cadence™ single use laparoscopic instruments.

From the intuitive, versatile and ergonomic design of our Suction Irrigator, to the unique one-handed deployment of our Specimen Retrieval Device, Cadence™ offers

a wide range of superior features to provide effortless performance and minimal interruption to your surgical flow.

Precision:
Precision tip provides constant, precise irrigation flow without compromising suction.

Intuitive:
Icons, colours and grooved triggers ensure suction and irrigation functions are easy to identify.

Minimal: Leaks
Simplified internal mechanism minimises the chance of leaks.

Reduced fatigue:
Ergonomic hand-piece for firm but comfortable instrument grasp reduces surgeon fatigue.

Configurable:
Dual shaft attachment options allow for quick and secure change between pistol and trumpet grip.

Our single use instruments are packed, sterilised and supplied as a complete instrument.

SUPPORT

With Eisner™ you don't get a call centre, just a dedicated team of specialists ready to tailor your Eisner™ experience.

Experience the difference

Book an obligation free trial

Our team can organise an obligation free, trial assessment of your instruments so you can see and feel the difference before you buy.

Trade-in / replacement program

Manage your tray upgrades

If you are considering decommissioning an instrument our trade-in/replacement service will assist you to address one off replacements or the gradual upgrade of instrument sets. We accept Eisner™ and non-Eisner™ instruments.

Care

Optimise Your Tray Performance

When you choose Eisner™ products our team are available to provide free comprehensive in-service training, support and tray assessments to guide servicing and repair.

Enhance your every move

Warranty | Eisner™ offers a 12 month warranty against manufacturing defect on all metal components of the equipment. Damage and / or breakages caused by improper use or abuse of the equipment are not covered by warranty. Normal wear and tear is not covered. Warranty is null and void where components are mixed with non-Eisner™ instruments.

Service & Repairs | Instruments returned to us for repair/replacement will be assessed and a written quotation provided for you to make a decision on further action. In most cases for instruments beyond repair we can offer a trade-in replacement. Eisner™ keeps factory original spare parts in stock. All repairs should be returned to Eisner™ for repair in order to preserve the integrity of your instruments.

Recommended Lifespan of Instruments | Whilst Eisner™ laparoscopic instruments will function for many years, we recommend replacement prior to any obvious signs of wear and stress which could lead to an issue during surgery. We recommend a lifespan of 3 years on our handles and inserts and suggest that after that time, they are traded in on a new component. Insulated Tubes: By virtue of the fact that insulated tubes will be replaced once the insulation is damaged or compromised in any way, it is not envisioned that the lifespan of a sheath will be beyond 12 months. Instruments should be taken out of circulation immediately if it is found that identifying labelling is no longer visible.
